

“I love Innovation”

Innovation is not just technology. Our group has created its own international success story by imposing constant innovation in our processes. This allows us to provide creative solutions, supported by the solid experience of an organisation composed of over 300 premises.

Our day to day challenge is to apply a culture of constant, 360° innovation in order to offer our clients an efficient and complete approach, developed in order to respond in an optimal way to the particular demands of each particular company, in terms of project support, production and customisation of packaging solutions.

Putting the client at the centre of everything we do is the fundamental characteristic of our modus operandi. In order to reach our important strategic objectives and to increase customer satisfaction, our group has developed a series of avant garde IT tools which aid product development, planning and control. These tools allow us to be constantly informed of the current state of every single element which makes up our operative mosaic.

Thanks to the support of RTS's ERP solutions, we are able to run and monitor the efficiency of all our company processes in an immediate and complete way. This is reflected in a guarantee to our clients of our utmost flexibility and our efficient support of their businesses.
